

High/Medium Voltage Substations

Professionalism, Accuracy, Reliability

Mammoth Energy provides specialized services and studies with high quality accuracy and reliability, for private and public projects.

01

MV/HV SUBSTATION AUTOMATION & COMMISSIONING

Our engineering team takes over the detailed system integration and testing.

02

OPERATION & MAINTENANCE

After the project's implementation phase is completed, the engineering team hands over the project to the O&M team.

03

SUPERVISION & MANAGEMENT

The next step refers to ongoing operations that ensure effective project management.

MV/HV SUBSTATION AUTOMATION AND COMMISSIONING

- ▶ Detailed design and engineering
- ▶ Licensing procedures (in compliance with client/IPTO requirements)
- ▶ Procurement of the necessary top-quality equipment
- ▶ Substation Automation Systems programming (SCADA, Relays, RTUs)
- ▶ Erection of the electrical equipment
- ▶ Testing and commissioning
- ▶ Handover to the client

OPERATION AND MAINTENANCE

- ▶ On-call services
- ▶ Remote support and monitoring
- ▶ Preventive maintenance
- ▶ Yearly maintenance
- ▶ Storage and spare materials management
- ▶ Technical training of personnel

SUPERVISION AND MANAGEMENT

- ▶ Project management
- ▶ Site management
- ▶ Construction/commissioning supervision
- ▶ Handover support
- ▶ Client technical consulting
